

THE HEYM REPORT

JULY 2015

Prepared by Gregory Heym, Chief Economist, Halstead Property

NYC POSTS STRONG JOB GAINS

- Employment in New York City was 2.8% higher in June than the year before, with 114,500 jobs added.
- Education and health services alone added almost 39,000 jobs over the past year.
- Manufacturing (-1,700) remains the only private-sector industry in New York City losing jobs.

BUILDING PERMIT SURGE CONTINUES

- The scheduled expiration of the 421a program at the end of June caused a flood of building permits in the first half of the year, as developers rushed to get approved before the program expired or was modified.
- Manhattan saw 10,914 new units authorized in the first 6 months of 2015, more than any other full year since 1985.
- For all NYC, the 41,998 permits filed in the first half of 2015 are already the most for any year since 1963.

ECONOMIC GROWTH REBOUNDS IN 2Q15

- The US economy grew at a 2.3% pace in the second quarter, up from a revised 0.6% in the prior 3 months.
- Stronger consumer spending fueled economic growth, although this figure was slightly below expectations.
- The past few years have seen weak economic growth at the beginning of the year, followed by improvement in the spring and summer.

NYC EMPLOYMENT (thousands)
